accurate, and easy-to-add to an existing layout, or single-dose according to a pharmacy's needs.

Main Features

1 Single-Dose and Multi-Dose Capable

Users can easily dispense both single-dose and multi-dose prescriptions. The device enables users to automate through variable dispensing and realize increased operational efficiency. provide solutions to customer's problems through theusability and high quality of our products.

2 Various Blister Cards Available

The device accommodates various blister cards, regardless of size or number for single-dose or multi-dose. It is possible to respond to changes in cards as required by facility and widen the range of dispensing, *Some of the cards may not be available. Please consult our representative for more information.

3 Adaptable for Manual-Filling

The device is capable of manual-filling. This function makes it possible for users to easily dispense by registering medication into the soft ware that doesn't have an associated canister, or for any less-frequent medications. It not only checks the position of distribution on the touchscreen, but it also allows the user to print a non-installed medication list, preventing mis-dispenses and incorrect medication selections.

Other Features

- 1 Compact footprint provides dispensing capabilities in limited workspaces.
- 2 Prescription pre-setting during dispense to minimize machine downtime.
- 3 Increased safety and mis-dispense prevention through scanner information checks.
- 4 Simplified medication path for easy-cleaning and cross-contamination prevention.

Optional Accessories

- 1 Light interception curtain for maintaining tablet quality.
- 2 Decrease Footprint via PC table
